

Interactive Notebook Setup

1. Label your notebook with your name, class and class period and the school year.
 - Write your name along the edges of the book as well with a sharpie or permanent marker.
2. Number the pages in your notebook, back and front, with the number in the upper right hand corner on the front pages and upper left corner of the back pages.
3. Using the front and back of the first five sheets divide each page into three columns.
 - Label these columns: Date, Table of Contents and Page number

Date	Table of Contents	Page #

4. Use the last three sheets of paper in your composition notebook to create your glossary.
 - Label each page, at the top of the first line, in the center, Glossary.
 - Then divide the page into four even boxes.
 - Write on letter in the corner of every box.
 - When you get to the last page of the glossary, put U, V, and W in their own box and X, Y, Z share a box because there are fewer vocabulary words with those letters.

A	B	U	V
C	D	W	X Y Z

5. If during the year we run out of glossary space, we will use a sticky note over the corresponding box and continue that way.
